"At Surgere Mexico, we are a hard-working group who mix great attitude, new ideas, and experience. Our focus is to learn and innovate our technology to generate a strong presence in Mexico."

Javier Lomeli leads Mexico operations and employees at our Aguascalientes location. Javier has deep expertise in team administration, material handling, and production control. In his role, Javier successfully launched a RFID project with a large automotive OEM.

Previously, he was the Service Center Manager at Orbis Corporation where he led the management and control of empty equipment and launched a large RFID project.

Javier holds a BA and MBA in Business from the Instituto Tecnologico y de Estudios Superiores de Menterrey (ITESM).

Surgere is an industry pioneer leveraging IoT technology to revolutionize the supply chain. Surgere knows the challenges and has engineered innovative secure technology, patented software, and certified hardware to consistently deliver 99.9% data fidelity. Surgere expands visibility into the physical supply chain supporting many of the world's leading industries.
